ANALYTICS FOR BUSINESS. AI-ENGINEERED. HUMAN-LED.

mAllytics replaces labor-intensive analytics workflows with orchestrated AI agents, governed by rules, templates, and validation checkpoints.

WHAT IS mAllytics?

mAllytics is an AI-powered platform that automates the end-to-end analytics value chain — with enterprise-grade human validation built in.

It replaces labor-intensive analytics workflows with orchestrated AI agents, governed by rules, templates, and validation checkpoints.

- ▶ It redefines how enterprises operationalize intelligence.
- ▶ Shift from labor-driven analytics to AI-orchestrated insight systems.
- ▶ Shift from fragmented reporting to governed decision engines.

WHY mAllytics?

Enterprise analytics today is labor-heavy, fragmented, and expensive.

Organizations rely on large teams across:

- ▶ Data Engineering
- ▶ BI Development
- ▶ Data Science
- ▶ Analytics Consulting
- ▶ Strategy Teams

Despite heavy investment, enterprises still struggle to consistently convert data into validated action.

mAllytics transforms this model.

CORE INNOVATION

Structured Governance Model

Unlike generic AI copilots, mAllytics operates on a structured governance model.

AI Agents Execution

Humans Validation

Enterprise Releases

Nothing moves to production without approval.

AI agents across Fully Automated Analytics Value Chain

Data Exploration

Schema mapping, profiling, KPI recommendations

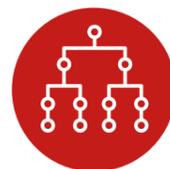

Data Transformation

Automated cleaning, business rule enforcement, reusable logic

Visualization

Auto-generated dashboards aligned to executive personas

Modeling

Forecasting, scenario simulations, performance comparison

Insight Generation

Narrative summaries, anomaly detection, risk identification

Strategic Analysis

Root cause analysis, benchmarking, decision-ready outputs

ARCHITECTURE & DIFFERENTIATION

Multi-Agent Orchestration Engine

- Explorer Agent
- Transformer Agent
- Dashboard Agent
- Modeling Agent
- Insight Agent
- Strategy Agent

Enterprise Rule Engine & Template Framework

- Define custom transformation rules
- Embed compliance logic
- Store KPI templates
- Lock approved metrics
- Standardize business definitions
- Create domain playbooks

Governance & Release Control Layer

- Validation Checkpoints
- Audit Logging
- Version Control
- Approval Workflow
- Enterprise Release Gate

Security & Deployment

- Security, Governance, and GDPR Alignment
- AI Security, Governance and Operational Controls
- Data Security & Privacy Assurance

ECONOMIC IMPACT

60-80%

Reduction in Analytics Operating Cost by reducing dependency on large analytics teams.

5-10x

Faster Insight Delivery From weeks and days to hours and minutes.

Minimising Dependency

Reduced dependency on manual effort for routine tasks, enabling teams to focus on strategic initiatives.

Standardized Enterprise Intelligence

Repeatable outputs across business units

**mAIlytics is not replacing analytics teams....
It is replacing analytics inefficiency.**
